

Operation instruction

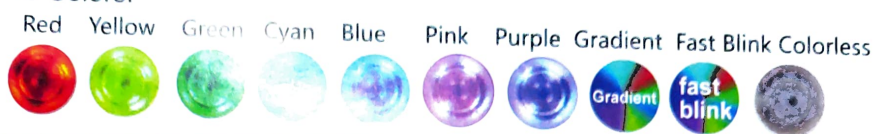

There are 7 areas and 10 colors modes available of the DTFS kit.

7 areas selected in turn:

Dpad, Left joystick, Logo button, Right joystick, ABXY, R1/R2, L1/L2

10 Colors:

1. Press the Logo button to wake up the DTFS kit, the DTFS kit will stay on only when connecting to the console or when it is charging.

2. Enter setting mode: L1 + Square button

Press L1 + Square button for 5 seconds enter setting mode, the setting mode will start from Dpad area.

(the relevant area LED will start to flash.)

3. Color choice: Right button

Press right button to select the LED colors. Press L1 + Square button for 1 second after you decide the color setting you want and then the color will go to the next area.

(the relevant area will be flashed.)

4. Exit setting mode: L1 + Square button

After you finish the color setting for all area, press L1 + Square button for 5 seconds to exit the setting mode.

5. Disable the DTFS LED kit: L1 + Right button + Square button

Disable the DTFS LED kit by press above buttons for 10 seconds, and then when the controller power on the LED will not be turned on at the same time. You can re-activate the LED kit with the same way.

PS: Choose colorless is another way to disable the LED kit, but in this case if you want to turn on the LED again, you have to enter setting mode to choose the LED color except colorless.
